PN 6087 SIZING BELT INSTRUCTIONS / WARNINGS

Warning: Do not use this product if you cannot understand and follow the instructions and warnings that come with it and complete all necessary functions.

The most critical measurement of a body belt, in terms of comfort, is dee measurement. The 6087 Sizing belt is designed to provide the user with an exact hip to hip (dee size) measurement. Use the sizing belt as outlined below to determine proper dee size.

Instructions

- Measuring with the sizing belt should be done over the clothing the user intends to wear under the body belt.
- Position the sizing belt around your body approximately 4" from the waist on top of hip bone to where body belt is worn. see fig. 1.
- Note the position of the heels (slotted end) of the dee rings. Disconnect the snaps on the sizing belt and adjust the length as necessary, so that the dee ring heels will be just forward of the hipbones rather than on them.
- When properly adjusted remove the sizing belt and take note of the number in the size window. see fig. 2.
- Add 1" to the number noted in the size window if ordering a non padded body belt, add 2" if ordering a padded body belt and add 4" if ordering a lightweight dri-lex body belt.
- This number is the dee size by which you should order your body belt.

Warning

SIZING BELTS ARE NOT safety products. This product is designed only to help you determine how to order a proper sized Linemen's Body Belt. Wearing the sizing belt as a body belt is an **IMPROPER USE** of the product. **SIZING BELTS ARE NOT** to be used for Work Positioning or Fall Protection Equipment as this product is not intended, manufactured or tested to meet those requirements.

Please consult with your physician prior to using this product. Do not use this product under the influence of drugs or alcohol.

Improper Use of This Product Will Cause Injury or Death

Cleaning

Proper maintenance and storage of your equipment will prolong its useful life and contribute toward its performance. The equipment should be cleaned and maintained at regular intervals depending on usage.

Leather - Using a sponge, wash leather with saddle soap and water, then wipe with a clean damp cloth. Allow the leather to dry completely - avoid high temperature heat sources. After drying, the leather should be oiled with 100% Neatsfoot Oil, wiping off any excess with a dry cloth.

NOTE: This product can not be returned unless it is in new / unused condition.

STATEMENT of OBSOLESCENCE:

Precise “useful life expectancy” or “shelf life” for this product is not specified, as the degree of use, conditions of use, and the degree of care and storage determines useful life. All users maintain responsibility to select proper equipment for the job, be properly trained in its use, and ensure all personnel support equipment passes inspection before each use. Upon evidence of defects, damage or deterioration, all equipment shall be removed from service immediately and tagged or marked as unusable or destroyed. Additionally, all equipment shall be inspected on a regular basis not to exceed one year by a Competent Person, as defined by OSHA/ANSI, to verify that the equipment is safe for use. In the event of any question or concern regarding the condition of such equipment, users shall remove the equipment from service for further inspection. All users must comply with OSHA/ANSI/ASTM standards prior to and in using such equipment. For more information regarding safe and appropriate use of equipment, please contact Buckingham Manufacturing at 1-800-937-2825.

INTERNATIONAL USERS:

Notwithstanding the above, please know that certain international jurisdictions require manufacturers of equipment to provide customers with a maximum useful lifespan (sometimes referred to as a “Statement of Obsolescence”). To the extent required, Buckingham personal protective equipment manufactured from synthetic fiber materials including but not limited to items such as webbing and/or rope are subject to a maximum useful lifespan of ten (10) years from the date of manufacture. As stated above proper usage, storage, maintenance, and care impacts the useful lifespan of equipment. Extreme circumstances may require that product must be retired after only one use. This statement is made in conformance and compliance with BS EN 365:2004. International users must ensure that product inspections are completed by Competent Persons as defined by international standards including but not limited to British Standard (“BS”). If equipment fails any inspections, it must be immediately withdrawn from service and destroyed. For more information regarding safe and appropriate use of equipment, please contact Buckingham Manufacturing at 1-800-937-2825.

OUR GUARANTEE:

We guarantee the equipment we manufacture to be free from defects in material and workmanship. We will repair any equipment deemed to be defective which is returned to us by the original purchaser. However, this guarantee is void if any product is changed or altered in any way, or if the product is used in a manner other than for which it is intended. This express guarantee supersedes all other expressed or implied guarantees, obligations or liabilities. There are no implied warranties of merchantability or fitness for a particular purpose and as such, all implied warranties are specifically disclaimed.

LIMITATION ON LIABILITY:

In no event will Buckingham or buyer be liable to the other for lost revenues, lost profits or any other indirect, consequential, special or punitive losses or damages, however caused, whether in action for breach of contract, strict liability, tort, or otherwise, even if advised of the possibility of such losses or damages. In no event will Buckingham’s liability exceed the total amount paid by the buyer to Buckingham for the product or equipment giving rise to such claim(s).
