

BUCKINGHAM MFG.

MODEL # 6911 BuckGuard - RETRACTABLE MAGNETIC GAFF GUARD ATTACHMENT INSTRUCTIONS

Warning: Do not use this product if you cannot understand and follow the instructions and warnings that come with it and complete all necessary functions.

Please consult with your physician prior to using this product. Do not use this product under the influence of drugs or alcohol.

Model # 6911 includes a retracting device that is encased in a protective leather cover and attached to the 6909M2 Gaff Guards. Gaff Guards are used to protect gaffs from damage and from damaging other equipment while stored and transported in tool bags. This gaff protector / guard is manufactured with an internal magnet molded into a durable polymer casing. These coatings / casings reduce friction between the gaff and the guard keeping gaffs as sharp as new. These coatings also prevent corrosion between the gaff and the guard. The retracting device enables the user to secure the gaff guards to the climbers for quick attachment and to prevent them from becoming lost. The retractors protective leather covers are manufactured with a 3/4" web attachment strap on one side and a 1" loop fastener securement strap on the other.

NOTE: Gaff Guards for Pole Climbers are mandated by OSHA regulation Part 1910.268(G)(2)(i). Use the appropriate Gaff Guard for the corresponding gaff / climber type. Model 6909M2 Gaff Guard fits all manufacturers Pole & Tree Gaff Climbers.

Attaching to Climber Pad:

- Open up the cushion wrap pad and disconnect the nylon retaining strap from the climber pad and pull it out through the climber sleeve loop, and insert loop (Fig. 1).
- Align the retracting device so that the 3/4" web attachment strap is facing down.
- Insert the climber pad nylon retaining strap through the retracting device 3/4" web attachment strap (Fig. 2), climber sleeve loop and insert loop (Fig. 3).
- Secure the hook fastener of the retaining strap to the loop fastener of the climber pad (Fig. 3).
- The 1" loop fastener securement strap should be facing outward and will adhere to the hook fastener of the climber pad when the pad is wrapped (Fig. 4).
- The gaff guards (model 6909M2) are manufactured with an internal magnet. Pull down on the gaff guard and align it over the gaff tip and push it on (Fig 4).
- When properly attached the BuckGuard should appear as shown in Fig. 4.

NOTE: Attaching the retracting device to the retaining strap creates a small void adjacent to the climber sleeve loop. This void was designed to be used to store the gaff guard when not in use as shown in Fig. 5.

**MODEL
6911**

To remove: pull straight down on the gaff guard and then let it slowly retract back into the retractor. Store units in a clean and dry location free of exposure to chemicals, corrosive elements, etc.

To prolong the service life of this unit, use caution when removing gaff guards. Kicking off the gaff guard or other aggressive action can reduce its useful service.

OVER

STATEMENT of OBSOLESCENCE:

Precise “useful life expectancy” or “shelf life” for this product is not specified, as the degree of use, conditions of use, and the degree of care and storage determines useful life. All users maintain responsibility to select proper equipment for the job, be properly trained in its use, and ensure all personnel support equipment passes inspection before each use. Upon evidence of defects, damage or deterioration, all equipment shall be removed from service immediately and tagged or marked as unusable or destroyed. Additionally, all equipment shall be inspected on a regular basis not to exceed one year by a Competent Person, as defined by OSHA/ANSI, to verify that the equipment is safe for use. In the event of any question or concern regarding the condition of such equipment, users shall remove the equipment from service for further inspection. All users must comply with OSHA/ANSI/ASTM standards prior to and in using such equipment. For more information regarding safe and appropriate use of equipment, please contact Buckingham Manufacturing at 1-800-937-2825.

INTERNATIONAL USERS:

Notwithstanding the above, please know that certain international jurisdictions require manufacturers of equipment to provide customers with a maximum useful lifespan (sometimes referred to as a “Statement of Obsolescence”). To the extent required, Buckingham personal protective equipment manufactured from synthetic fiber materials including but not limited to items such as webbing and/or rope are subject to a maximum useful lifespan of ten (10) years from the date of manufacture. As stated above proper usage, storage, maintenance, and care impacts the useful lifespan of equipment. Extreme circumstances may require that product must be retired after only one use. This statement is made in conformance and compliance with BS EN 365:2004. International users must ensure that product inspections are completed by Competent Persons as defined by international standards including but not limited to British Standard (“BS”). If equipment fails any inspections, it must be immediately withdrawn from service and destroyed. For more information regarding safe and appropriate use of equipment, please contact Buckingham Manufacturing at 1-800-937-2825.

OUR GUARANTEE:

We guarantee the equipment we manufacture to be free from defects in material and workmanship. We will repair any equipment deemed to be defective which is returned to us by the original purchaser. However, this guarantee is void if any product is changed or altered in any way, or if the product is used in a manner other than for which it is intended. This express guarantee supersedes all other expressed or implied guarantees, obligations or liabilities. There are no implied warranties of merchantability or fitness for a particular purpose and as such, all implied warranties are specifically disclaimed.

LIMITATION ON LIABILITY:

In no event will Buckingham or buyer be liable to the other for lost revenues, lost profits or any other indirect, consequential, special or punitive losses or damages, however caused, whether in action for breach of contract, strict liability, tort, or otherwise, even if advised of the possibility of such losses or damages. In no event will Buckingham’s liability exceed the total amount paid by the buyer to Buckingham for the product or equipment giving rise to such claim(s).
